

a distribution scheme for revenues from reclamation project lands; to the Committee on Energy and Natural Resources.

By Mr. BENNETT (for himself, Mr. CAMPBELL, Mr. BROWN, Mr. JEFFORDS, Mr. STEVENS, and Mr. HATCH):

S. 621. A bill to amend the National Trails System Act to designate the Great Western Trail for potential addition to the National Trails System, and for other purposes.

By Mr. LEVIN (for himself, and Mr. ABRAHAM):

S. 622. A bill to amend the Clean Air Act to provide that a State containing an ozone nonattainment area that does not significantly contribute to ozone nonattainment in its own area or any other area shall be treated as satisfying certain requirements if the State makes certain submissions, and for other purposes; to the Committee on Environment and Public Works.

By Mr. SPECTER (for himself and Mr. HATCH):

S. 623. A bill to reform habeas corpus procedures, and for other purposes; to the Committee on the Judiciary.

By Mr. HATFIELD:

S. 624. A bill to establish a Science and Mathematics Early Start Grant program, and for other purposes; to the Committee on Labor and Human Resources.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. DOLE:

S. Res. 92. A resolution amending Rule XXV of the Standing Rules; considered and agreed to.

S. Res. 93. A resolution making majority party appointments to the Energy and Natural Resources Committee, the Veterans' Affairs Committee, and the Committee on Indian Affairs; considered and agreed to.

S. Res. 94. A resolution making a Majority party appointment; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BRADLEY (for himself and Mr. LAUTENBERG):

S. 611. A bill to authorize extension of time limitation for a FERC-issued hydroelectric license; to the Committee on Energy and Natural Resources.

FERC-ISSUED LICENSE AUTHORIZATION EXTENSION ACT

• Mr. BRADLEY. Mr. President, I introduce legislation which would allow the Federal Energy Regulatory Commission to extend a license already granted to the Mount Hope pumped storage project. It is my understanding that the FERC has no objection to this extension and that the agency itself would grant the extension, if it were not statutorily prohibited from doing so.

I am very pleased to have Senator LAUTENBERG as a cosponsor on this legislation.

The Mt. Hope project is an advanced pumped-storage hydroelectric plant. It will be constructed on an existing industrial site that has been active for almost 300 years. It will be largely underground, once it is established, and should have a very limited environmental impact.

This project will cost \$1.8 billion to construct and will be financed entirely by the private sector. It is estimated that this single project will create up to 1,300 jobs during construction and provide about \$20 million annually in property taxes.

Mr. President, the project's existing license will expire in August, 1996. When the license was originally requested and granted in the early 1990's, the sponsors presumed that the financing would be complete and construction underway by 1996, as required. Unfortunately, the extended economic recession intervened. Because of the general economic climate and the difficulty of financing any project of this magnitude, the start-up date has slipped.

Normally, I am very hesitant to intervene in any way in a regulatory process. However, since I understand that the FERC has no objections and will support this extension, I am willing to move ahead. I also understand that the Congressman representing this district, Rodney Frelinghuysen, is preparing companion legislation.

When the FERC granted the original license, they required public hearings and an extensive environmental analysis. While I understand that there is substantial local support for this project, this legislation will now be the subject of additional hearings. Before agreeing to move the legislation in the Senate, I will weigh carefully any new comments or concerns about the project and I will be contacting local community members to gauge the level of their enthusiasm and support.

Mr. President, I ask unanimous consent to have the text of the bill printed following these remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 611

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding the time limitation of section 13 of the Federal Power Act, the Federal Energy Regulatory Commission, upon the request of the licensee for FERC Project No. 9401 is authorized, in accordance with the good faith, due diligence, and public interest requirements of section 13 and the Commission's procedures under such section, to extend until August 3, 1999, the time required for the licensee to commence the construction of such project. This section shall take effect for the project upon the expiration of the extension (issued by the Commission under section 13) of the period required for commencement of construction of such project. •

By Mr. ROCKEFELLER (for himself, Mr. DASCHLE, Mr. GRAHAM, and Mr. MURKOWSKI):

S. 612. A bill to amend title 38, United States Code, to provide for a hospice care pilot program for the Department of Veterans Affairs; to the Committee on Veterans' Affairs.

VETERANS' HOSPICE CARE SERVICES ACT

• Mr. ROCKEFELLER. Mr. President, in the spirit of strengthening our commitment to provide a comprehensive package of health care benefits to veterans eligible for care in the VA health

care system, I am today introducing a bill that would require VA to conduct a hospice care pilot program to determine how best to provide hospice care services to terminally ill veterans. I am proud that Senators DASCHLE, GRAHAM, and MURKOWSKI have joined with me as original cosponsors. As the number of veterans who are elderly or have terminal illnesses continues to grow, the need and demand for VA hospice care is likely to increase. We must stay ahead of the surge and explore the various ways to provide such care, so our veterans and their families will have the best choices available to them.

Our legislation is derived from S. 1141, which I sponsored and which was incorporated into the committee bill, S. 1030, of the 103d Congress. Though S. 1030 passed the Senate, it did not pass the House. The bill also builds upon S. 1358 of the 102d Congress which Senator GRAHAM introduced on June 24, 1991, and the Senate passed on October 16, 1991.

Although VA has expanded and improved hospice care services over the past 4 years, it continues to fall short of the goals we envisioned. Thus we feel compelled to introduce the Veterans' Hospice Care Services Act of 1995.

SUMMARY OF PROVISIONS

Mr. President, this legislation would expand comprehensive VA hospice care programs and promote VA research on hospice care. The bill would amend chapter 17 of title 38 to establish a new subchapter VII, the provisions of which would:

First, require VA, during the period beginning on October 1, 1995, and ending on December 31, 2000, to conduct a pilot program in order to assess the desirability of furnishing hospice care services to terminally ill veterans, and determine the most effective and efficient means of furnishing such services.

Second, require VA to furnish hospice care services under the pilot program to any veteran who has a life expectancy of 1 year or less, as certified by a VA physician and who is entitled to VA hospital care, eligible for and receiving VA hospital or nursing home care, eligible for and receiving care in a community nursing home under a VA contract, or eligible for and receiving care in a State veterans home for which VA is making per diem payments to offset the costs of that care.

Third, specify that the hospice care services that VA must provide to veterans under the pilot program are: The services to which Medicare beneficiaries are entitled under the Medicare's hospice care benefit, and personal care services, including care or services relating to activities of daily living, such as dressing, personal hygiene, feeding, and housekeeping.
